

Employee Exit Survey Analysis – DETE, Queensland

**Presented by
Naja Fathima KT**

EXPECTED OUTCOME

- Find the main reasons why employees leave (e.g., stress, job dissatisfaction).
- Group exits into voluntary, involuntary, and retirement, and see how long they worked.
- Check how employees rated their work experience (support, morale, growth).
- Look at who is leaving more — by age, gender, or background.
- Give easy-to-follow ideas to help reduce employee turnover.
- Help HR make better decisions using real data.

PROBLEM STATEMENT

- High employee turnover observed in DETE, Queensland.
- Lack of structured insights from rich exit survey data.
- Need to understand reasons behind voluntary exits, retirements, and dismissals.
- Unclear impact of workplace factors like support, stress, morale, and promotion.
- No clear demographic trends or risk segments identified yet.

BUSINESS CONTEXT

- The Department of Education, Training, and Employment (DETE), Queensland, regularly collects exit survey responses from departing staff.
- These surveys aim to understand why employees leave — including resignations, retirements, and other exits.
- Insights from this data help DETE:
 - Improve employee satisfaction and work culture.
 - Design better retention and development strategies.
 - Become an employer of choice in the public sector.

DATA CONTEXT

- The dataset includes **822 employee exit survey responses** with **56 columns**.
- Data covers:
 - **Employment details** (position, start date, region, status).
 - **Exit reasons** (job dissatisfaction, career move, stress, workload, etc.).
 - **Workplace experience ratings** (support, morale, development).
 - **Demographics** (age, gender, background, disability).

TECHNOLOGY STACK USED

- **Microsoft Excel**

- Data cleaning (e.g., mapping Likert values, handling blanks)
- Pivot Tables & Pivot Charts for aggregation and visualization
- Count, Countif, and logical formulas for analysis
- Bar charts, pie charts, clustered column visuals

- **PowerPoint**

- Structured presentation of EDA results
- Slide-based summaries for each key question or demographic insight

DATA CLEANING SUGGESTIONS

Handled Missing Values:

- Replaced blanks, NA, and Not Stated with "Unknown" or appropriate placeholders in categorical columns.
- Retained rows with partial missing values to preserve useful information.

Column-Specific Cleaning:

- Cleaned demographic fields: Age, Gender, Aboriginal, Torres Strait, South Sea, Disability, NESB.
- Ensured date columns like Cease Date, DETE Start Date, and Role Start Date are in proper date format.

DATA CLEANING SUGGESTIONS

Standardized Text Entries:

- Normalized inconsistent text formats (e.g., "Worklife balance" vs. "Work life balance").

Converted Data Types:

- Verified and corrected data types for numerical, categorical, and date columns.

Checked for Duplicates:

- Ensured unique records based on ID field to avoid double counting.

Demographic Data Cleaning (Aboriginal, Torres Strait, etc)

- Identified blanks in key diversity indicators (Aboriginal, Torres Strait, South Sea, Disability, NESB).
- Standardized missing entries by replacing blanks with "N/A" for consistency.

Exploratory Data Analysis (EDA)

PERSONAL AND EMPLOYMENT INFORMATION

SECTION 1

Respondent Profile :-

- Majority of employees are from Metropolitan.
- CentralNot stated office has the least number of employees.
- Distribution shows regional concentration in workforce.

Count of BusinessNot StatedUnit

- Top business units by headcount are Education Queensland
- Certain units show underrepresentation, possibly requiring staffing.

- Majority in 61 or older group.
- Only one employee in 20 or younger

Count of Aboriginal

Aboriginal Identity Representation

- 3 % of employees identify as Aboriginal.
- 85 % of people can't identify Aboriginal

Count of Disability

Disability check

- 23 employees disclosed having a disability.

Count of NESB

Non-English Speaking Background

- 61 % are NESB — valuable for tailoring communication.
- Reinforces multicultural engagement strategies.

Count of SouthNot StatedSea

South Sea Islander Identification

SouthNot StatedSea

- Representation of South Sea Islanders is 13 %.
- Highlights cultural background awareness in workplace.

EXECUTIVE SUMMARY

Survey Overview

- The DETE Exit Survey captures insights from former employees across roles, regions, and demographics, aiming to understand their reasons for exit and assess workplace experience.

Key Findings

- **Top Exit Reasons:** Retirement, Resignation, and Career Progression.
- **Critical Concerns:** Stress, Workload, Job Dissatisfaction, and Limited Recognition.
- **Workplace Positives:** Peer support and professional development scored relatively well.
- **Areas of Concern:** Morale, supervisor support, and communication are notably weak.
- **Demographics Insight:** Majority of exits fall in the 36–50 age range; female employees are the dominant group.

Implications and Strategic Focus

- **Internal Factors Matter:** Stress and dissatisfaction outweigh external reasons like retirement.
- **Diversity & Inclusion:** NESB and minority group insights call for inclusive HR policies.
- **Retention Levers:** Better leadership, recognition, and career planning are key.

Recommendations

- **Improve Supervisor and Leadership Engagement**
Regular 360° feedback, coaching programs, and accountability reviews.
- **Prioritize Mental Health & Stress Support**
Launch robust wellness programs and reduce workload intensity.
- **Strengthen Internal Communication**
Transparent updates, open channels for “My Say”, better feedback loops.
- **Revamp Career Development & Recognition**
More clear promotion pathways, regular training, and visible appreciation.
- **Focused Retention Strategy**
Targeted retention plans for high-risk groups (e.g., mid-career staff, NESB employees).

THANK YOU
